NOVA Integration Solutions expands its operations with the addition of a new VP of Marketing

Saint Cloud, Florida, December 01, 2012: NOVA Integration Solutions Inc. (NIS), an advanced electronic packaging company, is pleased to announce plans to expand operations to include the addition of a new VP of Marketing. These plans consist of growing its global sales force and expanding into the industrial “mission critical” market place. The existing in-house machining center will also be expanded to meet the demands for quick-turn prototyping.

Michael E. Martyniak has been added to the organization as their new VP of Marketing. As noted by Dean Markley, GM & VP of Operations, “Mike brings in excess of 25+ years of experience to NIS. His product knowledge and commitment to our Sales Channel Partners is a critical component to our growth.”

“Our expansion and growth is significant,” says Mike. He continues to state that “our current capabilities establishes a proven track record that can also be applied to meet many mission critical industrial applications that must also operate in challenging environments such as light rail and maritime embedded computing. To meet our growth objective, new strategic supplier relationships and capabilities will be added during CY2013.”

About NOVA Integrated Solutions: NOVA Integration Solutions Inc. (NIS), is an engineering-based small business providing advanced electronic packaging to include the design, manufacture, integration and testing of sophisticated electronic equipment and embedded computers. The company is a leading provider of rugged and MIL SPEC enclosures currently used by the defense industry in support of their applications requiring high-reliability worldwide. NIS is known for their airborne (ATR), ground mobile (LRU) and maritime rackmount enclosures, rugged printers, custom backplanes and offers a vast array of the high-performance, platform-specific hardware solutions in the market.
