Press Release

NOVA Integration Solutions Enters into a Mutual OEM Relationship with Five9 Network Systems, LLC

Saint Cloud, Florida, February 10, 2015: NOVA Integration Solutions (NIS) known for their advanced electronic packaging is entering into a mutual OEM relationship with Five9 Network Systems, LLC (Five9NS). The relationship will produce a Five9NS family of highly-specialized MIL spec convection-cooled servers and workstation products in support of their commitment to provide high-performance systems and storage solutions to the military market. These fully integrated Five9NS products will also be available and marketed by NIS using their world-wide Sales Channel.

"The goal of the relationship," says Michael Martyniak, VP of Marketing at NIS, "is to provide Five9NS with military-grade enclosures that can quickly be adapted to meet the ever changing PC server market." Five9NS is committed to **rapid deployment** and is well known for their ability to quickly introduce Intel® based products shortly after their release.

"Military grade products currently available on the market often fall behind the technology curve," says Souheil Saliba, CEO of Five9NS. "Our goal is to provide MIL spec state-of the art competitive high-performance servers and workstations soon after the underlying architecture is introduced. As with all our other products, Five9NS will be able to engage with each of our customers and provide an optimized MIL spec product compliant to their personalized needs. The enabling partnership with NIS gives Five9NS the ability to customize all aspects of our products including the enclosure, I/O ports and the underlying motherboard technology."

About NOVA Integration Solutions: NOVA Integration Solutions Inc. (NIS) is an innovative engineering-based small business providing advanced electronic packaging to include the design, manufacture and testing of sophisticated electronic equipment and embedded computers. The company is a leading provider of rugged and MIL SPEC enclosures currently used by the defense industry worldwide. NIS is known in the market for their custom airborne (ATR), ground mobile (LRU) and maritime rackmount enclosures. Rugged printers and custom backplanes are also provided to include a vast array of the high-performance, platform-specific hardware solutions.
